SUBJECT: Umezawa visit April 16

Dear Josh,

Dr. Nestor Bohonos from SRI has raised the question of whether we want Umezawa to give a seminar here when he visits on April 16. If you think this is appropriate, the Division of Clinical Pharmacology could co-sponsor such a seminar with the Department of Genetics.

Bohonos suggested the possible title, "Microbial Secondary Metabolites and Possible Involvement of Plasmids in their Biosynthesis." Apparently this is the title of a talk that Umezawa will be giving at the ACS meeting that he is going to when he leaves Stanford.

Please let me know your thoughts on this.

Stan
